

☐

Play these two math games to practice your number fluency.

### Three Addend Snap Card Game and 100 Frame Fill Up

How to play Three Addend Snap: 3 Players divide the cards evenly between themselves. Players then each turn over a card at the same time. The first person to correctly add them together and say the sum out loud collects all three cards. In the event of a tie, players keep their own cards. The third player's card is removed from the game. Play continues until one player loses all of their cards. The other two players count their cards to determine the winner. (If playing with only two people, players can alternate putting down two cards.)

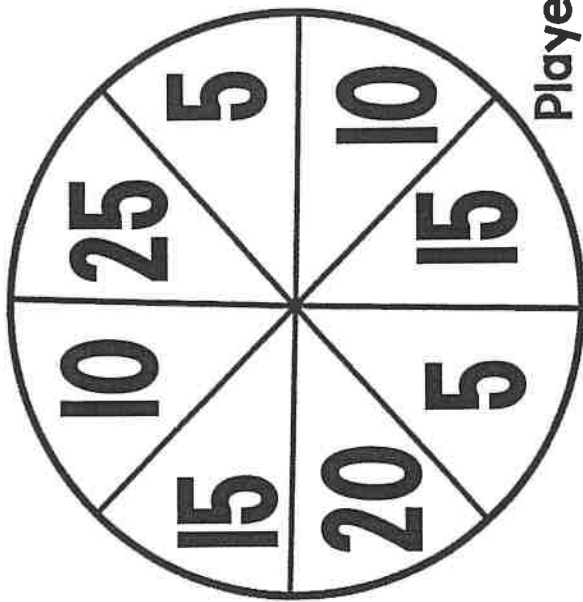

### Scholars are thankful and grateful.

Think of two people you appreciate. It can be someone in your family, a coach, or teacher. Write them a letter to tell them how much you appreciate them. Address an envelope and mail the letter. ☺
