

Name: _____

October Monthly Homework due on Monday, November 3

Diorama Project Preparation

Habitat: _____

Animal: _____

After learning about the diversity of life in class, your child has chosen to learn more about the animal listed above. They will be writing a book about all that they have learned and create a diorama in class.

We will supply the students with basic craft supplies to use. To help prepare them for this time, your child is to

- Find a shoebox to use
- Sketch their diorama and brainstorm what supplies they will need to create the animal in its natural habitat. **THINK what does your habitat need so your animal can survive? (Include living and non-living things) Will you include predators that lurk in the background?**
- Gather any special items they'd like to use beyond the basic craft supplies at school and place them in the shoebox.

Supplies Provided:

Glue	Scissors
Tape	Paper
Yarn	Wood
Felt Squares	Cardboard
Pipe Cleaners	Straws
Bottle caps	cotton balls
Rolls (large and small)	

Complete the bottom portion of this page, cut it and glue it on the side of the shoebox.
Place all special items they'd like to use for their diorama and bring to class on November 3.

Starfish

Blue & Gold Macaw

Arctic Fox
